INTRODUCTION

Who We Are

50+

Production systems shipped

15+

Countries served

99.9%

Uptime SLA

DevEthix Solutions & Consultancy is a software development and ICT solutions company based in Addis Ababa, Ethiopia, delivering production-ready systems for organizations across Africa, Europe, the Middle East, and the US.

We build enterprise platforms, AI systems, payment integrations, and real-time applications that go live in weeks rather than months - backed by weekly demos, transparent timelines, and honest scoping from day one.

Every engagement includes a full year of training, maintenance, and hosting, so the systems we deliver stay owned and operated by the teams who rely on them - not abandoned after launch.

Our clients span real estate, business consulting, and multi-industry conglomerates - with more than 50 live systems currently running and 10,000+ active users on platforms we've built.

Software that solves real business problems

Core delivery pillars, plus long-term ICT support so technology keeps running after launch.

1

Enterprise Platforms

HR, inventory, LMS, and job portals - custom-built for real operations.

Inventory & forecasting • HR & payroll • LMS • Recruitment/ATS

2

AI & Automation

Multilingual AI that understands the market - not generic chatbots.

Amharic & Tigrigna NLP • Voice/text chatbots • LLM integration

3

Payments & Fintech

Local and global payment rails integrated properly, not hacked together.

Telebirr & Chappa • Stripe & M-Pesa • Bank APIs • Multi-currency

4

Real-time & Web3

Live systems, multiplayer apps, and blockchain when it adds real value.

WebSocket architecture • Multiplayer games • Smart contracts

5

ICT Support & Maintenance

Continuous support for websites, software, servers, and cloud infrastructure.

1 year free support • Staff training • Servers & cloud

Technology doesn't end at deployment

DevEthix provides ongoing ICT support and maintenance to help organizations keep their systems secure, stable, and reliable long after launch.

1

1 Year Free Support

Included with every engagement at no extra cost.

2

System Maintenance

Bug fixes, performance monitoring, and priority support.

3

Server & Cloud Support

Infrastructure management and continuous uptime monitoring.

4

Security & Updates

Patches, SSL, backups, and proactive threat monitoring.

5

Staff Technology Training

Onboarding and refresher sessions for your team.

6

Long-Term ICT Partnership

Ongoing support that keeps systems reliable for years.

WHAT WE SUPPORT

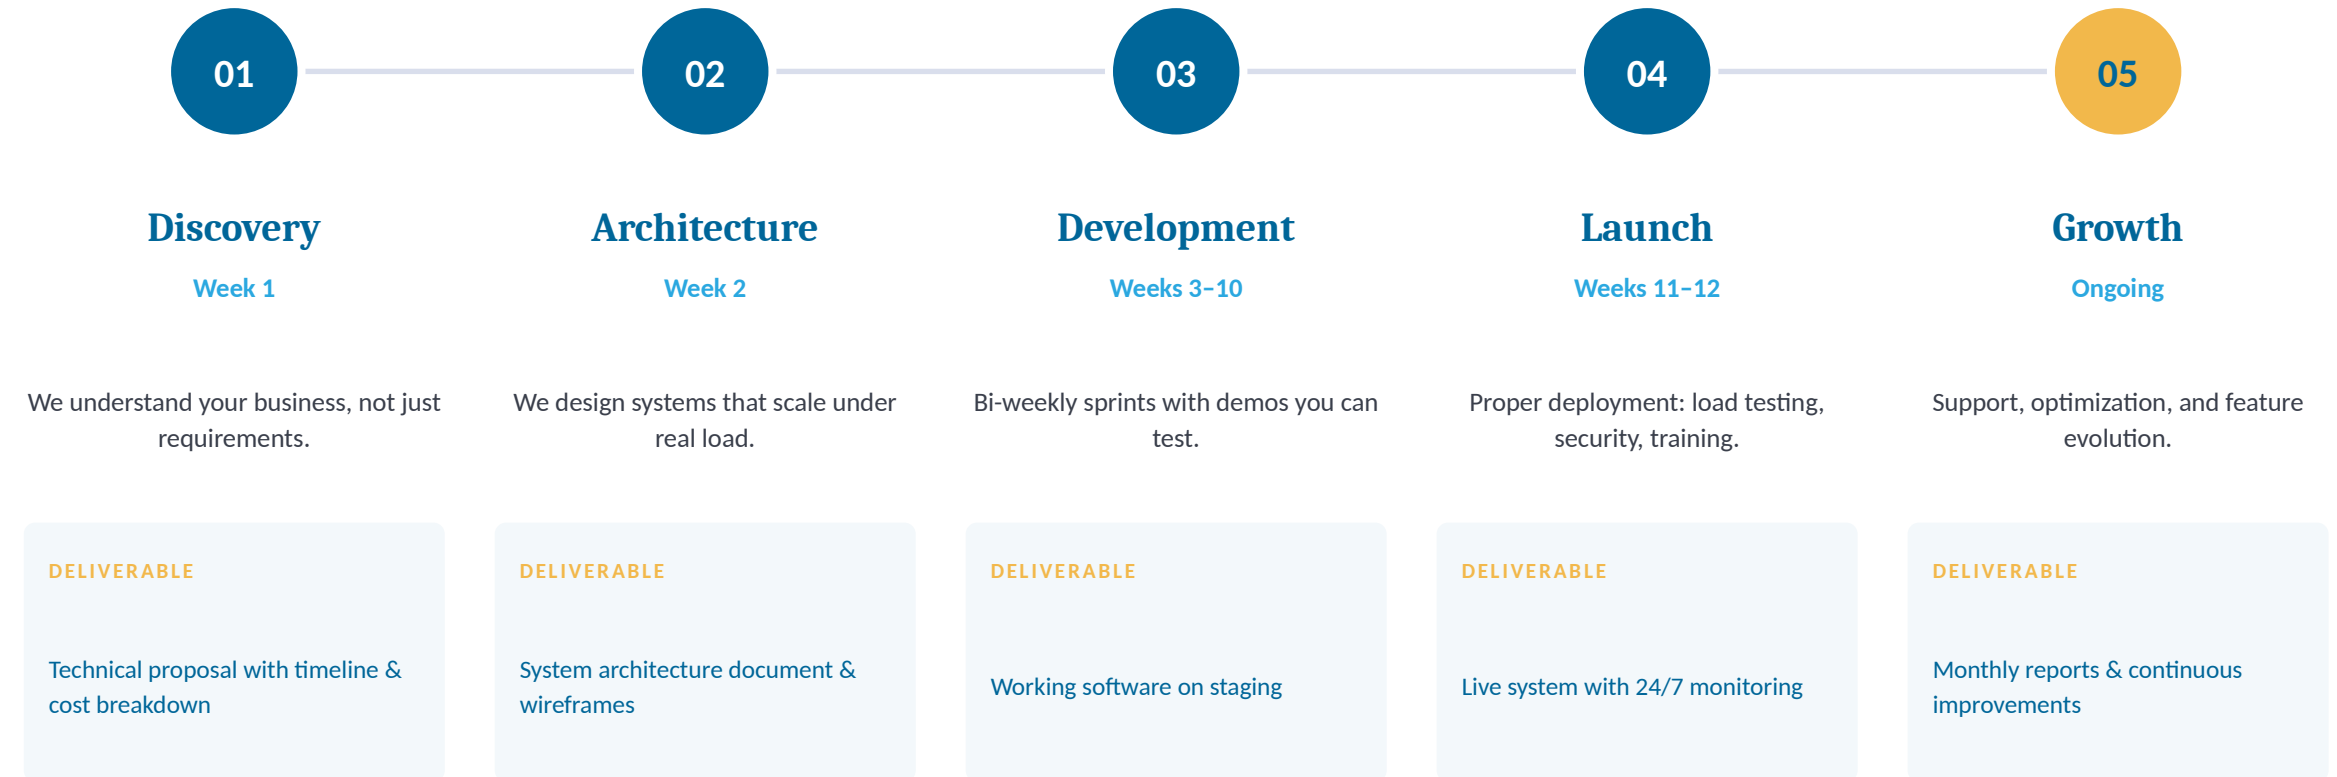

- Websites & web apps
- Software systems
- Servers & cloud infrastructure
- Business email & domains
- Databases
- Other ICT environments

"No hidden upsells - support is built into every engagement."

HOW WE WORK

From kickoff to production in 8–12 weeks

A proven process refined across hundreds of projects - transparent, iterative, and built for speed.

CAPABILITIES

Systems we build & deploy

Production-ready solutions already running in real environments - not concepts on a slide deck.
